Document Purpose:

This document serves to give the audience the events that they will run into when using the software.

Target Audience:

Target audience is the user that's going to use said software.

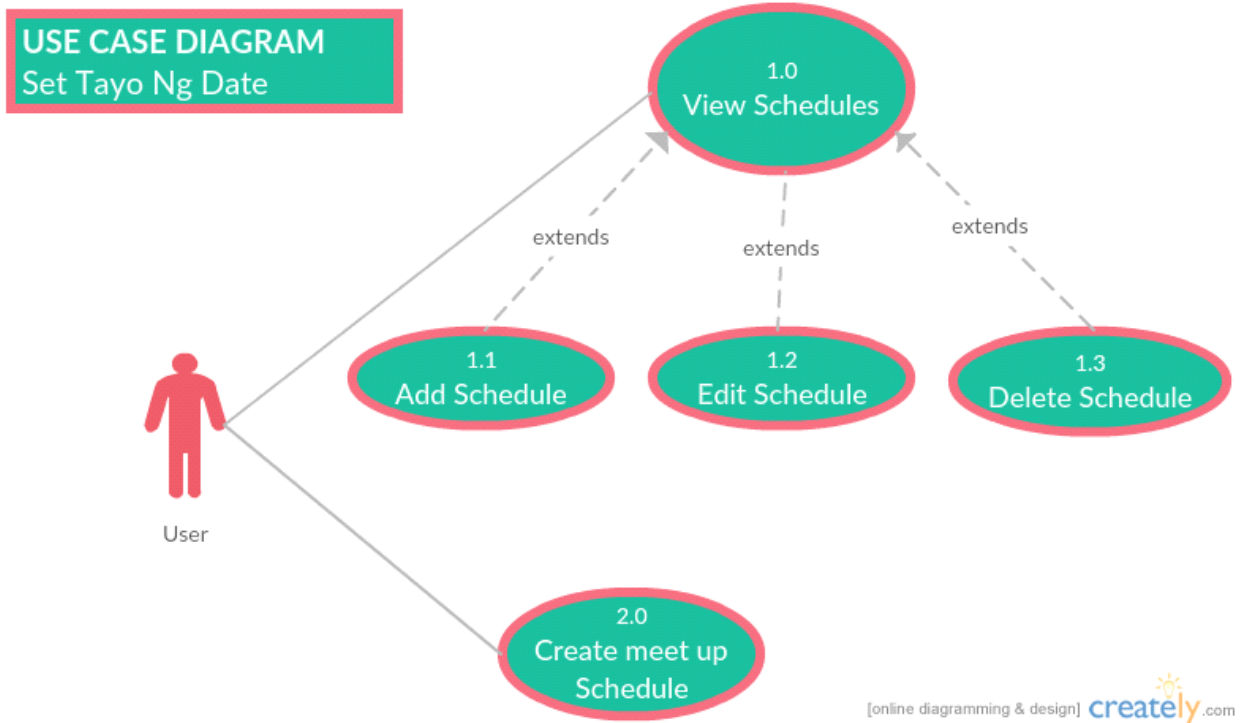

Revision Control*History Revision:*

Revision Date	Person Responsible	Version Number	Modification
09/24/16	Kyle Rosales	1.0	Initial Document
09/26/16	Kyle Rosales	1.1	Add user description and list of use cases
9/29/16	Arvin Bandong	1.2	Added UCM, description of Edit Schedule and Delete Schedule
		1.3	Edited the "Edit Schedule" and "Delete Schedule" description
9/29/16	Edward James Bariring	1.4	Edited "View Schedules" and "Add Schedule" description

System Name: Set Tayo Ng Date

Description: This software allows people in a group to input their schedules into the software's database. It is a tool to help people set meetings when everyone in the group is free by displaying everyone's schedules. It also has advance search options which lets you answer questions like "When is Alice, Bob, and Charlie free between 10 am and 2 pm?"

Use-Case Diagram:

List of Actors:

Actors	Description
User	Any person such as a group leader or a project manager who is using the software to set aschedule between the group. The user is the one who keeps track of everyone's schedules. The user is also the one who sets meetings within the group.

List of Use-cases:

Use-Case	Description
Use-Case 1.0 View schedules	The user will see the schedules inputted from use case 1.2. In case of having no schedule inputted, user will be presented an

	option to create a new meetup schedule that will be displayed later.
Use-Case 1.1 Add schedule	The user will get the schedules of the people he/she will meet and puts it in the software. After inputting a schedule of a person, user will be presented an option to add another schedule for another person. After putting all schedules, user will be presented the option to save said schedules.
Use-Case 1.2 Edit schedule	<p>The user can edit any available schedule. He can either search the name of the person that he wishes to edit, or manually scan it from the list. After finding the desired schedule table, he can now click "Edit" button and apply the changes he wants to make.</p> <p>After the changes that he made, he can choose to either save or cancel those changes.</p>
Use-Case 1.3 Delete schedule	The user can delete any existing schedule table. He can either search the name of the person that he wishes to delete, or manually scan it from the list. After finding the desired schedule table, he can now click the "Delete" button and a confirmation message will appear. Deletion will proceed if "Yes" is selected and it will be canceled if "No" is selected.
Use-Case 2.0 Create meetup schedule	The user can create a meetup schedule. The user inputs the time range for the meetup and the required members for that meetup. The software displays all schedules within the time range where all the required members are free at that time. The user selects one schedule as the meeting schedule and it goes to the "List of Upcoming Meetings".
